

# Documenting a REST API

Method	URL	Request Body (JSON)	Response (JSON)
GET	/api/person/all	Get all persons	[id,email, firstname, lastname] (1)
GET	/api/person/hobby/{hobby}	Get persons with the specified hobby	[id,email,firstName, lastName]
POST	/api/person/add	Adds a person to the database	
PUT	/api/person/edit/{id}	edits a person with the given id	
DELETE	/api/person/delete/{id}	deletes a person with the given id	

These five api end points is duplicated into our five resource classes.

## Request Body and Response Formats
